AVERTISSEMENT

Le présent Atlas étant imprimé sans autre texte que les légendes imprimées en regard de chaque Planche, les auteurs n'y ont fait figurer que des espèces antérieurement décrites; si quelques changements de nomenclature leur ont paru nécessaires, la synonymie de l'espèce déjà connue est, dans ce cas, indiquée entre parenthèses.

L'ordre suivi est celui du « Catalogue illustré des coquilles fossiles de l'Eocène des environs de Paris », c'est-à-dire celui de la table analytique qui termine l'Appendice nº II de cet ouvrage, amendée ou complétée en tenant compte des modifications apportées dans l'Appendice nº III (1902), ou de celles qui ont pu surgir depuis dans quelques autres publications ; en d'autres termes, cet Atlas n'est autre que la table précitée, mise à jour et illustrée, et les espèces classées dans le même ordre y ont reçu les numéros de Genres et d'espèces de ladite table ; cette numérotation est également celle des légendes de renvoi aux figures en regard des Planches. Ce moyen a été imaginé pour alléger nos légendes de toutes les références antérieures à l'Appendice nº II du Catalogue ; par conséquent, nous n'avons introduit dans nos légendes que les références postérieures à cet Appendice, soit celles assez nombreuses de l'Appendice nº III, soit celles des rares publications survenues depuis et visant des changements à apporter à des espèces parisiennes.

La légende de chaque espèce comprend donc :

- 1º La numérotation en deux nombres, le premier représentant le nº du Genre, le second correspondant à celui de l'espèce dans chaque Genre, y compris les intercalations résultant de l'Appendice nº III;
- 2º Le nom du Genre et celui de l'espèce, en caractères gras ; entre les deux et entre parenthèses, s'il y a lieu, le nom de la Section, en caractères italiques, ou bien celui du Sous-Genre quand il n'y a pas de Section démembrée de ce dernier ;
- 3º Le nom de l'auteur de l'espèce, placé entre crochets quand l'espèce a été décrite par lui dans un Genre autre que celui que nous adoptons;
- 4º Le grossissement ou la réduction, suivant les cas, des échantillons figurés; l'indication en est faite sous la forme d'une fraction, par exemple: 5/1 signifie « grossi 5 fois », 3/2 « grossi une fois et demie », 1/3 « réduit au tiers ».
- 5º La référence, s'il y a lieu, entre crochets; exemple: [APP. III, p. 46], ou [PAL. U., fich. 50], cette dernière signifiant *Palæontologia universalis* où se trouveront faites plusieurs rectifications;
 - 6º La localité d'où proviennent les échantillons figurés;
- 7º L'indication en petites capitales du terrain dans lequel ont été recueillis les échantillons figurés; ici, nous avons introduit une amélioration relativement aux signes conventionnels assez vagues que contenait le Catalogue illustré, en reprenant les dénominations modernes, adoptées pour désigner les différents niveaux stratigraphiques du Bassin de Paris: Thanétien et Sparnacien, à la place de E. I. I. Cuisien à la place de E. I. (V. G. Dollfus, Bull. Soc. géol. Norm., T. VI. 1879, p. 589 et suiv.). Lutétien à la place de E. M., étape qui se divise, d'après M. Dollfus en Calvimontien, Parnésien et Neptodunien (Nanterre). Bartonien à la place de E. S., se divisant, d'après le même auteur, en Anversien, Ermenonvillien, Mortuofontainien, y compris Andoénien (faciès de Saint-Ouen) et Ludien (faciès de Ludes).

Ces indications figurant en abrégé [Than. Sparn. Cuis. Lut. Bart.] ne se rapportent, d'ailleurs, qu'aux échantillons figurés, et elles n'engagent pas la répartition verticale de l'espèce dans d'autres niveaux : celle-ci reste, le cas échéant, telle que l'ont indiquée Deshayes et le Catalogue illustré, et nous l'avons repérée dans chaque cas en petits caractères à la suite du niveau d'où proviennent les échantillons figurés.

I

11-1

```
H
            61 - 5
                    Est la coquille figurée, sans numéro, entre 6-13 et 6-15.
     III
            20 - 1
                    Est la plus grosse des deux coquilles numérotées 20-2.
                    Au lieu de : Desh.,
     IV
            29-5
                                            lire : d'Orb.
            30 - 5
                                                  Eutrochus.
                                 Eutrochas
      1.
            34-5
                                                   34.5.
                                54.5
     VI
            43-31
                    Ajouter: (Pachysyrnola).
    VII
            49-15
                    Au lieu de : concinua, lire : concinna.
            52-1
                    Est la coquille figurée à gauche de 52.2.
            52-10
                                           à droite de 52.9.
     IX
            59-22
                    Ajouter: Thionville-sur-Octon.... Lut.
            61-2
                    La coquille figurée à droite de 61-2 avec le numéro 61-3, doit être rappor-
            61-3
                    La coquille figurée à droite de 61-3 avec le numéro 61-2, doit être rappor-
                                                                                  tée à 61-3.
                    Est figurée en bas de la planche IX en dessous de 61-20, avec le numéro
            59-21
     XI
                    La coquille figurée dans l'angle supérieur gauche doit être rapportée
            64-12
                                                                                     à 64-12.
    XII
            79-3
                    Au lieu de
                                78-3
                                         lire: 79-3.

                                 102 - 3
          102-3
                                 102-8
                                               102-3.
 XVIII
          117-2
                                 117-12
                                               117-2.
          118-8
   XIX
                    Est la coquille figurée à droite de 118-17.
                    Ajouter à la légende: 117.7 — Faunus Dufresnei [Dh.] var. Laubrierei
    XX
          117-7
                         Cossm.: c'est la coquille étiquetée à tort 117.14 sur la planche XX.
          117-14
                    Manque: 117-14 Faunus rigidus [Sol.]...Fère-en-Tardenois. Bart.
                                                                             [V. App. III].
 IIIXX
          132-6
                    Est la coquille figurée à gauche de 132.7.
          137ter6
  XXVI
                    La coquille figurée à gauche de 137-47 doit être rapportée à 137<sup>ter</sup>6.
 XXVII
          145-5
                    Ajouter à la légende : et 5'.
           150 - 7
                    La 2e figure à droite représentant cette espèce est figurée par erreur
                                                                                   sénestre.
          151 bis 2
XXVIII
                    Au lieu de : 152-2, lire : 151 bis2.
          151-35
                    Ajouter à la légende: 151-35 Potamides (Potamidopsis) extraconicus
                    Cossm. gr. nat. [V. aussi Pl. XXXIX]....Berville. Bart. Ajouter à la légende : (V. aussi Pl. XXVIII).
 XXIX
          151-35
           157-2
                     Est la coquille figurée entre 151-2 et 151-4, avec le numéro 121-5.
 XXXI 151-3
                                                157-1 et 157-3,
                                                                               157-3.
           157-9
                    La coquille figurée en-dessous de 157-12 doit être rapportée à 157-9, les
                                 deux autres portant le même numéro sont bien des 157.12.
```

```
Ajouter à la légende : (V. Pl. XXXIV).
 XXXIII 165-2
            165-3
  XXXV
            167-2 et 2' L'un représente une coquille d'après nature, l'autre une reproduction.
XXXVIII
            185-15
                     Représente une forme plus élancée que le type 181-15.
            186-6
                      La 1re figure à gauche représentant cette espèce est figurée par erreur
            187-1
                      Est la coquille représentée à droite de 187-1, les deux autres portant le
                                                  numéro 187-1 sont bien de cette espèce.
 XXXXIX
            193-1
                      Est la coquille figurée à droite de 195-1, avec le numéro 192-1 et 194-1.
            195-3
                      La 2<sup>e</sup> figure à droite représentant cette espèce a été figurée par erreur
            171-6
      XL
                      Ajouter à la légende : (V. aussi Pl. XXXIX).
            198-2
                      Est la coquille figurée avec le numéro 198-2.
     XLI
            198-9
                      Ajouter à la légende : (Voir Pl. XL).
    XLII
            202-2
                      Est la coquille figurée au-dessus de 202-12, avec le numéro 202-6.
   XLIII
            204-7
                      La 2<sup>e</sup> figure à droite représentant cette espèce a été figurée par erreur
                                                                                     sénestre.
            205-7
                      La figure supérieure représentant cette espèce a été figurée par erreur
                                                                                     sénestre.
    XLVI 210-4
                      Au lieu de : caumontiensis lire : laumotiensis.
            210-5
                                  parnensis
                                                        parisiensis.
  XLVII
           212-18
                      Est la coquille figurée à droite de 212-17 avec le numéro 212-12.
  XLVIII
           214bis1
                      Au lieu de : stranboides lire : stromboides.
           214 bis 10
   XLIX
                                  macrocentus ---
                                                      macrocentrus.
                                  ce numéro
            218-14
                                                      218-12.
       LI
            224 bis 36'
                                                      224-36"
      LII
            224-41
                                                      Pleurotoma.
                                  Pieurotoma
     LIII
            225-39
                                  ce numéro
                                                      225-39'.
            225-43
                                                      Tripia.
                                  Tripiu

                                  mart
                                                      mut.
            226-19
                      Ajouter à la légende : Raphitoma Chevallieri [Cossm.] — 2/1.... Le Fayel...
            235-1
     LIV
                      Au lieu de : conovulifornus, lire : conovuliformis.
            242-2
                      Au lieu de ce numéro, lire: 242-12; et sur la planche, au lieu de: 242-5,
                                                                                lire: 242-12.
            238-1
                      Sur la planche, il y a, à gauche de 238-5, deux figures 238-1 qui se rappor-
                        tent en réalité à 242-11 de la planche LV, les légendes sont exactes.
      LV
            245-4
                      Au lieu de : Herorcvalensis, lire herouvalensis.
    LVIII
                      Au lieu de ce numéro, lire : 255-11, comme sur la planche.
            255-1
            272-4
                      Sur la planche, les deux figures qui portent ce numéro sont en réalité
     LIX
                               attribuables à 255-2 (Pl. LVII), mêmes clichés d'ailleurs.
                      Au lieu de : Brevispina, lire : brevispina.
      LX
               2-3
   LXIII
                      Au lieu de ce numéro, lire : 44-15.
             66bis2 et 70-7 Intervertir les provenances : Bart, à la place de Cuis, et vice-
             77-15 Au lieu de ce numéro, lire: 77-3. La même erreur a été reproduite dans
                                        l'appendice V : il n'y a en réalité que trois Berellaia.
             70-7 et 86-8 Supprimer le signe +.
    LXIV
                      Ajouter à la légende: 52-53 + Scala (Crisposcala) Vatinæ de Boury. —
                                                      8/1.... Vaudancourt.... Lut.
             58-5'
                      Sur la planche, la coquille est numérotée à tort 58-51'.
                      Au lieu de : Crouy, lire : Meaux ; c'est bien BART et non calcaire de
            117-13
                      Ducy, comme l'indique la note infrapaginale. Au lieu de ce numéro, lire : 121-7, exact sur la planche.
            121-1
                                             — 119ter2, et remplacer : C. remiensis Cossm
            119-2
                                                                  par (V. App. V. p. 138).
     LXV
            153-4
                      Au lieu de : Chennpus, lire : Chenopus.
                      Sur la planche, cette espèce est inexactement désignée 150-2.
            180-2
            198-1'
                      Le grand Clavilithes de droite est inexactement désigné 198-4, lire 198-1'.

⁽¹⁾ Cette espèce appartient peut-être au même genre que Faunus pireniformis (117-12) Desh. (Cerithium). En tout cas, le plésiotype que nous figurons est l'échantillon de la coll. de Raincourt, qui a servi de type à cet auteur pour son Cerith. Curoli, synonyme postérieur de P. Suzanna d'Orb.

⁽²⁾ Échantillon incomplet qui a de l'analogie avec Semisinus Pistati C. (116-2).
